About This Game

2 sides, 8 nations, and one battlefield: Europe!

Wargame: European Escalation is an intense and spectacular Real Time Strategy game, where realism and strategy are brought to the front lines.

With a phenomenal range of vehicles and units (over 350 different models), build your army and enter a huge military campaign across Europe of the 80's, as the Cold War is about to become World War 3.

With the powerful IRISZOOM™, Wargame offers breathtaking graphics and battles as spectacular as they are strategic. Prepare to bring hundreds of units of all kinds--tanks, helicopters, squad Infantry, etc.--under your command in intense battles on gigantic maps stretching up to 60 square miles!

Online service EugenNet© provides a full multiplayer experience with creation of clans, organizing games, and world rankings where up to 8 players can compete simultaneously in massive battles involving hundreds of units!

Another simple minimalistic puzzler where you move blocks around a grid based on some rules. The presentation is awesome and the puzzles are actually really engaging. The progression is good but there are only 50 puzzles. I like these types of things but it can be argued that it's not worth the money really.. make me use my brain ! ty. I can not recommend this game as you can't play it if there is no one online.. and there's never anyone online. I'll change my review when the developer adds single player mode.. Good game made by good devs.

And the fact that its early access means that its gonna be even better.. Great game, port is kinda bad. You have to go [here](#) if you want to actually play it, though. The game would crash my computer while it loads. Really solid puzzles, I will be playing the others.. I love this soundtrack.

Note its delivered as MP3 and FLAC. the mp3 can be accessed via the music app under the subfolder SoundTrack (Really this should be called something like Luna Sky Soundtrack)

The FLAC is delivered in a ZIP file in the steam folder

(Your Steam Location)\SteamLibrary\steamapps\common\Luna Sky\soundtrack

. This is NOT a puzzle game. This is a trial-and-error physics game that's feels like Angry Birds more than anything else. All 30 levels are based on a single gimmick with little variation and the whole game can be 100% finished in about 20 minutes.

Unless you're interested in a lot of simple achievements, BLOK DROP NEO is hard to recommend.. As in the description The Elite Units of America DLC adds 15 new elite units to the American, British and French factions. A greater variety of available units is always welcome. If you like one of these factions you'll love this add-on.

Its like those puzzle games that have really simple mechanics, but are really hard. This one is more skill based than puzzles though. Overall, its pretty good.. ENG:

Very nice & fun little retro racing game! Testimonial! :3

FIN:

Todella kiva ja hauska retromeininkin autopeli, suositteluni! :3. A short way to describe this game is to basically say that its like Uma Thurman fighting the Crazy 88 in Kill Bill but with no end. Highly enjoyable, if you've played Hotline Miami and/or FURI this will feel right at home as a casual arcade experience. Also like Hotline Miami you will Press R to Restart a lot.

The more in depth description is that you play Akane, fighting infinite yakuzas (probably spelled that wrong pardon me) while trying to not bite the bullet. Which is insanely difficult, as you die in one hit to anyone. You have the ability to do many things, such as:

Swing your sword (this consumes stamina, nothing else does but this).

Dash through crowds killing every enemy in them (initially, you actually can earn different swords with different movesets).

Shoot your gun (also can earn different guns, you earn these by trying to play differently than you usually do).

Do a small dash to evade enemies (personally I haven't used this much to at all yet, it seems more efficient to just kill them).

Use a special ability to kill literally everything on screen (I generally avoid this as it can easily end your combo, which lets you do the dash-to-kill and this ability a lot more).

And that's about it.

I have had a lot of fun since you do get different weapons that change your abilities the more you play.. A brilliant piece of software that enables people that have no real talent in drawing (like myself) to create amazing pieces using only their imagination.

The game has two parts. In the 'puzzle' section one has to put elements in predetermined spaces and complete puzzles.

With each puzzle completed more elements are unlocked for future use in the 'creative' part of the game. More important is that with each puzzle solved one understands how to use the creative part of the software.

The 'creation' part is of course where this game shines. Only limit is the imagination. One can write short stories, poems, haikus, share work in social media, print work, create from large scale paintings down to miniatures and so on.

Note that you cannot draw lines with this software. You use elements and create paintings.

Music on the background adds to the traditional Chinese aesthetics of the game.

A huge plus is Steam Workshop Integrated where other users puzzles and works can be downloaded and solved.

All and all this game is becoming one my favorites. It is relaxing, easy to use and aesthetically pleasing!

. I dont even know where to begin about this game. In the few hours that I have played so far I have become completely invested in the characters and in the story. They are all so loveable. Ive only followed Yui's route so far and it has had me smiling, laughing and getting teary eyed. That to me is the sign of a fantastic visual novel, when your invested in the characters and want to be in that world with them. The story has also been pretty well written so far and is captivating. Although nothing grand in scale it is still a very endearing "highschool" story that is fun to play though.

My only wish is that the game had a few more choices in it so far. Most of the choices are for getting you on route paths as far as I can tell instead of actually having something like a conversation with the characters. I know in certain instances I wish I could just speak for the MC but I understand how difficult it is to make a story with choices that have impact instead of having meaningless choices just for the sake of having a lot of choices.

Also, more CGs...definetly need more of those.

Im looking forward to finishing this game, I think I still have time left and I cant wait to keep moving forward with these

characters!. Do not buy this utter pile of Steaming crap.. I do not know how to use this add-on. I bought it in order to increase the look of my cessna dashboard.

I have paid for this add-on and reached out to ask for support when i couldnt see any changes and i have not received an answer.

Does this add a plane to my choice of planes? i do not see that there is a new plane added. I also do not see any changes to my existing cessnas.

Due to not seeing any change or a new plane and not receiving any clear instruction i asked for a refund within 4 hours, but my refund request was denied and no one explained to me how to use this add-on.

When i download the manual for this add-on all i see it control instructions, this does not help me because i do not know howto add the plane.

How do i use this add-on, can anyone help since obviously i am not getting a refund?
. Nice 10V10. Favorit Crimson Dragon
